

## DIFFERENCES BETWEEN ORIGINAL AND FAKE SEAT BELTS SABELT

1. **Brand/ logo** – small black - red („annual“) logo is no more in use for **15 years**

2. **Stitchings pattern** – original is just with **one** crossing – look at the pictures

3. **Buckle** – after unfastening of all harnesses points, stay **ORIGINAL** fasten **on lower harnesses, i.e. 5. a 6. point** (by **FAKE** stay on sideways point)

**4. Colour of the buckle:**

- by the streak BASIC – iron with black plastic shield
- by the streak STEEL – aluminium, whole silver (combination of aluminium and plastic shield **is no more produced since 2012!**)

**5. FIA hologram** – always on one of the **shoulder harnesses**, valid for harnesses produced since 1/1 2013, it means: Belts valid **until end of the year 2017 DON'T HAVE** a hologram. Belts valid **at least until end of the year 2018 MUST HAVE** a hologram.

***Made by Sabelt S.p.A.***

## Note's

Box: Glossy paper and no label with the PO. Low quality of the pictures to the left. No instruction book in the box.

**CORRECT**

Webbing looks coarser and the stitching is very different.

**CORRECT stitching patten is different.**

The buckle is fixed to one of the hip straps. The buckle doesn't look as any of the buckles you are produced today and it's different on the backside, Sabelt and ITALY is readable from the same direction

**CORRECT, actually the buckle can be attached to a lap strap but usually our standard belts are attached to crotches.**

No FIA hologram. Black FIA-label FIA D 124. 1/98, on all Sabelt harnesses I have in stock it's FIA D 120. 1/98

**Actually D-124/98 is a valid Sabelt homologation number, but that is the Formula style homologation therefore they put the wrong FIA number on this belt.**

Adjusters, ringbolts and hooks have no id / PO-number and the quality looks?????? There is no hole for a split pin in the hook.

**CORRECT**

**Tongue attached to buckle. The shape of the tongue is different from original.**

**Buckle. The black buckle is no longer in production since a few years, therefore impossible to have a 2015 dated belt with that buckle**

**Homologation tag. The material of the FIA label is clearly different from ours.**
